2115	

NOTIFICATION DATE	DELIVERY MODE
01/29/2008	ELECTRONIC

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

JERRY.SHORMA@HP.COM
mkraft@hp.com
ipa.mail@hp.com

Office Action Summary	Application No. 10/780,397	Applicant(s) WAGNER ET AL.	
	Examiner Jaweed A. Abbaszadeh	Art Unit 2115	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 October 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-46 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-46 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Claims 1-46 are presented for examination.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-46 are rejected under 35 U.S.C. 102(e) as being anticipated by Yeates et al. (hereinafter known as Yeates) US 2005/0125698.

As to claim 1, Yeates teaches a computer security system comprising:

a self-managed device that controls access to the self-managed device by a user; and

a security module that authenticates a user and, in response to user authentication, automatically generate, transparently to the user, device credential data verifiable by the authentication system to enable access to the self-managed device ([0030], [0032], [0033] and [0034]). Specific attention should be drawn to [0033].

Yeates teaches when a password is registered for the first time, a one-way encryption hash of the password phrase is produced and persisted in the database. This translates into generating device credential data (hash of the password). When the user performs a subsequent access 'a comparison of hash values is performed to determine whether the user is an authorized user' ([0034]).

As to claim 2, Yeates teaches randomly generating the device credential data (hash, [0033]).

As to claim 3, Yeates teaches the security module is adapted to automatically transmit, transparently to the user, the device credential data to the self-managed device ([0033]).

As to claim 4, Yeates teaches the security module is adapted to receive a request from a networked administration client to activate the authentication system of the self-managed device ([0042]). The second line of defense is not activated until the first line of defense is penetrated.

As to claim 5, Yeates teaches the security module is disposed within a basic input/output system (Fig. 1, 133).

As to claim 6, Yeates teaches the security module is adapted to access relational data correlating the user to the device credential data for the self-managed device ([0034]).

As to claim 7-9, Yeates teaches an activation/deactivation module accessible by an administration client to activate/deactivate the authentication system of the self-managed device ([0042]). If the first line of defense is penetrated, then the authentication system is activated.

As to claim 10, Yeates teaches the security module is adapted to perform a registration operation to register the self-managed device ([0033]).

As to claims 11-15, Yeates teaches these claims according to the reasoning set forth supra in claims 1-10.

As to claims 16-24, Yeates teaches the claimed system as set forth in claims 1-10. As such, Yeates teaches the method to implement the system.

As to claims 25-46, Yeates teaches the claimed system according to the reasoning set forth in claims 1-10.

Response to Arguments

3. Applicant's arguments with respect to claims 1-41 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jaweed A. Abbaszadeh whose telephone number is (571) 270-1640. The examiner can normally be reached on Mon-Fri: 7:30 a.m.-5:00 p.m..

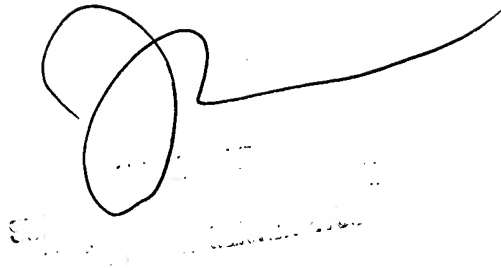

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas C. Lee can be reached on (571) 272-3667. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
